EDUCATION

B.Tech in Electronics and Telecommunication Engineering • 8.0 CGPA

Madhav Institute of Technology and Science (MITS), Gwalior • Madhya Pradesh, India

WORK EXPERIENCE

Hapz Software Solutions Pvt. Ltd. [Feb 2026 – Sep 2026]

Junior Unity Developer • Noida, India

- Developed a guided **VR fire-safety simulation** for **Meta Quest 3** using **XR Interaction Toolkit**, implementing interactive PASS extinguisher mechanics, hazard navigation, and instructional UI.
- Built an interactive **AR Globe explorer** from scratch using **AR Foundation (ARCore/ARKit)** with real-world globe tracking, 3D country mesh highlights, and complete responsive game UI.
- Integrated **PlayFab cloud backend** for **Teleporto**, implementing player **statistics**, leaderboards, Google authentication, cloud save synchronization, and localized player UI.
- Implemented an interactive **inventory system**, game UI, puzzle mechanics, and custom **Unity Editor tools** for **Emory Cole**, streamlining hotspot placement and Arcweave narrative integration.

Nilee Games and Future Technologies [Apr 2025 – Oct 2025]

Unity Developer Intern • Remote

- Developed **4 commercial educational games** in Unity and C#, implementing physics interactions, drag-and-drop mechanics, interactive UI, and **WebGL deployment**.
- Collaborated closely with game designers in agile sprints, resolved gameplay bugs, and engineered multiplayer mechanics using **Unity Netcode**.

PROJECTS

The Office [[Itch Link](#)] [Original Project]

Tech: Unity, C#, 2D Platformer, Enemy AI, NavMesh

- Designed and built a complete original 2D platformer end-to-end — concept, mechanics, art integration, and release.
- Implemented physics-based character movement, patrol and chase enemy AI with NavMesh pathfinding, melee combat with hit detection, and collectible systems.
- Built modular gameplay systems with clean animation state machines, a custom debugging overlay, and sprite rendering optimized for consistent 60 FPS.

Lunar Lander 2D [[Itch Link](#)] [Extended from Code Monkey course]

Tech: Unity 6, C#, Physics 2D, Cinemachine

- Based on Code Monkey's Lunar Lander course; extended the project with [YOUR EXTENSION] and refactored the architecture into a modular, separated-concern system beyond the tutorial structure.

GetCooked 3D [[Itch Link](#)] [Extended from Code Monkey Kitchen Chaos]

Tech: Unity 6, URP, C#, ScriptableObjects, State Machines

- Based on Code Monkey's Kitchen Chaos course; extended with [YOUR EXTENSION] and rebuilt the data layer using ScriptableObjects, C# Events, and runtime input rebinding not present in the original course.

SKILLS

Languages & Core: C# (OOP), C++, JavaScript, Python, SQL, Data Structures & Algorithms

Game Engines & XR: Unity 6 (URP), Godot Engine, UI Programming (uGUI), AR Foundation, OpenXR, Meta Quest 3

Architecture & Networking: ScriptableObjects, State Machines (FSM), Events, Photon Fusion, Unity Netcode, Cinemachine

Backend & Production Tools: PlayFab (Player Statistics, Leaderboards, Cloud Save), REST APIs, Git, Plastic SCM, Rider, Visual Studio, Blender, Aseprite, Jira

CERTIFICATIONS

Unity Certified Associate: Game Developer — Unity Technologies [[Verify Credential](#)]

Google Play x Unity Game Developer Training Programme 2025 • Selected nationally (1 of 500) • Score: **686 / 700**
