Portfolio

Delhi / Noida, India

"be the change that you want to see in the world"

EXPERIENCE

Hapz Software Solutions Pvt. Ltd.

Junior Unity Developer

Feb. 2026 – Present

Noida, India

- **Architected scalable gameplay frameworks** using ScriptableObjects, Event Bus architecture, Service Locator and custom Unity Editor tooling across **6 commercial Unity applications**, enabling reusable, data-driven content pipelines and improving long-term maintainability.
- **Engineered production backend systems** using PlayFab, implementing authentication (Email, Google, Facebook, Guest), cloud save, leaderboards, progression, runtime localization, player statistics and resilient offline synchronization across multiple game modes.
- **Developed cross-platform AR and XR applications** using Unity 6, AR Foundation, ARCore, ARKit, OpenXR and XR Interaction Toolkit, delivering reusable simulation frameworks, GeoJSON-based country detection, custom URP shaders and enterprise VR training solutions.
- **Built multiplayer networking systems** using Photon Fusion and Unity Netcode, implementing reconnection workflows, session recovery, synchronized gameplay systems and production networking improvements.
- **Designed modular gameplay systems** including dialogue, inventory, puzzle frameworks, tutorials, progression, economy, hotspot interactions and event-driven UI architecture while delivering production features across multiple shipped Unity projects.
- **Improved development workflows** by creating Unity Editor automation tools, debugging utilities, analytics pipelines and automated testing, reducing manual setup effort and increasing production reliability.

Nilee Games and Future Technologies

Unity Developer Intern

Apr. 2025 – Oct. 2025

Remote

- Developed **4 commercial educational games** using Unity and C#, implementing gameplay systems, AI behaviours, drag-and-drop mechanics, physics programming, UI architecture and WebGL deployment while maintaining smooth runtime performance.
- Implemented multiplayer gameplay using Unity Netcode, optimized gameplay systems and collaborated closely with designers to deliver production-ready features under agile development cycles.

PROJECTS

Lunar Lander 2D | Unity 6, C#, Cinemachine

- * Developed a complete 2D physics-based landing game featuring procedural gameplay systems, fuel management, collectibles, scoring, checkpoints and modular C# architecture.
- * Implemented polished gameplay with Cinemachine camera effects, UI, particle systems, audio, level progression and gameplay optimization for a smooth player experience.

GetCooked 3D | Unity 6, URP, C#

- * Built a complete cooking simulation prototype from scratch implementing player movement, interaction systems, recipe management, object handling and delivery mechanics using clean software architecture.
- * Designed reusable gameplay architecture using ScriptableObjects, C# Events, Interfaces, State Machines and modular UI systems with input rebinding, audio and game state management.

The Office | 2D Platformer | Unity, C#

- * Developed a complete 2D platformer featuring physics-based movement, enemy AI, combat mechanics, collectibles and optimized rendering while independently delivering the project end-to-end.
- * Implemented modular gameplay systems with pathfinding, animation state management, debugging and performance optimization using production-oriented development practices.

TECHNICAL SKILLS

Programming: C#, C++, JavaScript, Python, SQL

Game Development: Unity 6, Unity URP, Gameplay Programming, Physics, AI, Multiplayer, Mobile Games, WebGL, AR Foundation, ARCore, ARKit, OpenXR, XR Interaction Toolkit, Photon Fusion, Unity Netcode, DOTween, Cinemachine, NavMesh, Shader Graph

Backend & Services: PlayFab, REST APIs, Authentication, Cloud Save, Leaderboards, Runtime Localization, Newtonsoft JSON

Tools: Git, Plastic SCM, Visual Studio, Rider, Blender, Aseprite, Figma, Jira

CERTIFICATIONS

Unity Certified Associate: Game Developer

Credential
